## BTS Selected as Finalist for Prestigious SECAF Emerging Business Award

*Builder of innovative technical solutions for the federal sector emerging as an industry leader*

**Columbia, MD**—Today, BTS™ announced that it was selected as a finalist for the “Contractor of the Year” Award presented by the Small and Emerging Contractors Advisory Forum (SECAF), for its work as an emerging solution provider to the defense industry and intelligence community.

SECAF is the premier organization for small and emerging government contractors. “SECAF recognizes that strong, emerging firms with revenues of less than \$25M in annual revenues rarely have an opportunity to be recognized, although they are accomplishing great things,” stated Shiv Krishnan, chairman of SECAF and CEO of government contractor INDUS Corporation. The second annual Awards Gala, where winners will be announced, is set to take place on April 29, 2010 at the Hilton McLean Tyson’s Corner. The event is expected to draw a wide range of small and emerging government contractors and the key stakeholders that rely on small business for new innovation.

“It’s a great honor to be selected as a finalist for this prestigious award by SECAF and to be recognized for our work providing military and other government clients with cutting edge solutions for the complex challenges they face every day,” said Sean Lane, CEO of BTS. “As former end users of information and telecommunications technology on the battlefield, we fundamentally understand the critical needs of our customers and look forward to continuing our work to revolutionize how they use, transmit and optimize information to fulfill their missions.”

The core product of BTS, Praefectus™, is an all-in-one software package that enables the establishment and management of a multi-mission mobile On Demand Cellular™ (3G/4G) network architecture. Leveraging the latest cellular architecture they help create, BTS is now working with mobile device companies to provide a suite of powerful mobile intelligence, analytic, and communications capabilities that will have far-reaching impacts on tactical operations in Afghanistan, Iraq, and beyond.

BTS is now working with a wide array of mobile device companies to provide them with powerful new communications and intelligence applications. The BTS Praefectus software is on

its way to becoming “the” cellular network mission management software that will be fielded upon multiple technology platforms resulting in unparalleled communications and intelligence capabilities.

BTS, LLC is a Columbia, Maryland-based, Veteran Owned Small Business (VOSB) that currently provides advanced, mobile telecommunications technology, software development and integration for the U.S. Government and the private sector. Since the company’s formation in 2008, the BTS mission is to pioneer, refine and distribute unique technical solutions to State and Federal Government markets to achieve communications and information dominance. Through a combination of innovative technical products and integration, high-quality professionals, and first-rate delivery execution, BTS focuses on addressing customer’s immediate and critical operational needs.

“BTS,” “Praefectus” and “On Demand Cellular” are trademarks of BTS, LLC.
