BTS Continues to Expand Top-Notch Management Team

Former NSA field officer adds technical expertise as the Director of Product Development

Columbia, MD—Today, BTS™, a leading provider of customized 3G/4G mobile technologies, announced the hire of Brian Ballard as Director of Product Development. Ballard will use his government and private sector experience to develop and evolve new technologies that support the operational and communication needs of our country's warfighters and first responders.

With over 10 years of experience at the National Security Agency (NSA), Ballard is a highly skilled professional in the field of national intelligence systems and computer engineering. He has managed all forms of data collection, dissemination, processing, and visualization. As the Chief Technology Officer of ARES Systems Group, Brian developed networking and embedded systems technologies for intelligence, surveillance, and reconnaissance systems in the government and military.

“What separates BTS from our competition is the real world experience and capabilities of our people and how we leverage these capabilities to fully understand and anticipate the needs of our customers,” said Sean Lane, CEO of BTS. “Brian’s background and unique capabilities will enhance our abilities to innovate and rapidly deploy cutting edge solutions for a wide array of national security missions.”

In the past eight months, BTS has doubled the number of people it employs and continues to expand its mission and scope.

“I am extremely fortunate to join BTS and will continue to devote all available energy toward improving connectivity and data access for soldiers in the field,” said Brian. “I can't say enough about how much BTS has accomplished and how excited I am to contribute to something that our warfighters and first responders truly need.”

BTS, LLC is a Columbia, Maryland-based, Veteran Owned Small Business (VOSB) that currently provides advanced, mobile telecommunications technology, software development and integration for the U.S. Government and the private sector. Since the company's formation in 2008, the BTS mission is to pioneer, refine and distribute unique technical solutions to State, Federal, and Commercial markets to achieve communications and information dominance. Through a combination of innovative technical products and integration, high-quality

professionals, and first-rate delivery execution, BTS focuses on addressing customer's immediate and critical operational needs.

“BTS” is a trademark of BTS, LLC.
